About

One of the many software engineers is someone who likes to build and solve problems with hands-on experience with backend development and microservices tools, along with a flavor for artificial intelligence and machine learning.

Professional Experience

Software Development Engineer II, *Getout Travel System Pvt Ltd*

Jul 2022 – present | Gurugram, India

Working as a **Backend Developer** on the engineering team primarily focused on **creating and maintaining** better **microservices** to **improve performance** and completing the requirement along with support to the frontend team for the same.

Associate Software Engineer I, *RxLogix Corporation India Pvt Ltd*

Jun 2021 – Jul 2022 | Noida, India

The need to **reduce the manual steps** involved in **installing a product** was the prime goal of our team. **Previous versions** of our project **used tomcat** for installation **resulting in dependency issues**.

We **worked on** integrating **Docker-based installation capabilities** to **resolve** the **existing issues** and **reduced time and error** from manual intervention.

Skills

Languages

TypeScript, JavaScript, Python, Java

Databases

MySQL, MongoDB

Tools/Frameworks

NodeJS, ExpressJS, AWS, Docker/Docker-Compose, Linux, Git, VS Code, Postman,

Projects

Modeling, Forecasting and Processing of PV Data,

Associated with Delhi Technological University

Aug 2019 – Apr 2020

We came across a **machine learning-based** approach for **forecasting PV Power** with the scope for **improvement in accuracy**. Beginning with replicating the actual results, we started working in addition to **looking for ways to improve the model**. After completing step one, we **introduced a new parameter** that helped us achieve the goal of **improving the prediction model accuracy by a significant amount**. Furthermore, getting it **published at the IEEE** conference under our name.

Education

Delhi Technological University,

Bachelor's of Technology

2016 – 2020 | New Delhi, India

Electrical and Electronics Engineering

GPA: 8.03

Happy Home Public School, Class XII

2016 | New Delhi, India

PCM with Computer Science

Aggregate: 87.2%

Happy Home Public School, Class X

2014 | New Delhi, India

CGPA: 9.6

Publications

A Machine Learning-Based Approach for PV Power Forecasting, *IEEE*

03 Aug 2020

In this paper, proposed a model based on machine learning to predict hourly-ahead PV output power.

Interests

Favourite Movies/Genre

- Marvel Cinematic Universe
- Martian
- Interstellar and etc.

Favourite Books

- Rich Dad-Poor Dad
- Atomic Habits
- Quiet
- Harry Potter and others
